BPI JOB PACKS

STREAMLINING EFFICIENCY WITH JOB-SPECIFIC BUNDLING

Maximize efficiency and keep projects on schedule with BPI Job Packs. This innovative solution not only saves money and streamlines your builders' efforts, but also enhances visibility and traceability for every order.

Why Job Packs?

Job packs are perfect for reducing errors on orders that contain multiple items and item sizes such as roofing materials, doors and trim, cabinets, decking, and more. Job packs can be bundled by job and job site and tagged with your customer and project information before reaching your lumberyard.

How do Job Packs Work?

Let's say your lumberyard orders 80 doors and related items for your builder's job site. When you opt for a Job Pack, the products in your order will be tagged and bundled to arrive together in one shipment, rather than in stages.

Benefits for You and your Customers

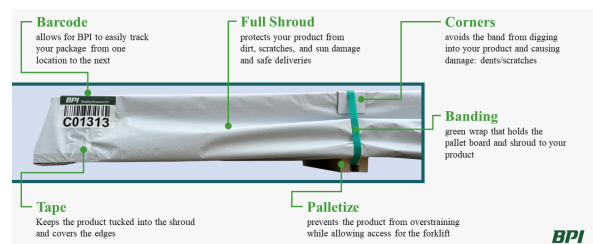

- Well-packaged, damage-free materials delivered to your yard or directly to the job site
- Clearly labeled, easy-to-identify bundles that better facilitate deliveries to specific locations, especially on multi-unit builds (e.g., "Roofing Materials for Unit A")
- An enhanced reputation for accuracy and efficiency with your builders and your builders' customers
- Faster receiving and turnaround time

Combined with BPI's Enhanced Packaging Systems, both you and your customers will enjoy peace of mind by seeing fewer errors, breakages, and lost items as well as clean, well-organized jobsites.

It's all about the experience...

Products well packaged are delivered in pristine condition, which enhances their perception of quality but also streamlines their project efficiency and satisfaction.
